In recent years, BTS has gone from being the popularity of a popular show in South Korea to possibly the biggest boy band in the world. BTS has already appeared several times on American TV, and if you've ever seen guys on stage, you might find that their catchy songs are mostly in Korean, not English. It's rare to see in the US, but it's made many wonder: does BTS have English songs in its discography? If so, why do they usually advertise with their Korean singles? Read below to find out the answer. Do BTS members speak English? BTS | Michael Kovac/Getty Images for The Recording Academy Maybe before we investigate whether BTS has English songs or not, it's important to get one thing out of the way: most of bts guys don't have fluent English. Group leader RM is the only member who speaks English well. When BTS speaks to a foreign press, RM is often responsible for answering interview questions and reversing the back and forth between Korean and English. However, other members know that English is doing the degree and have been studying hard since BTS received international recognition in 2017. Jungkook, the youngest of the group, even said that he was making a lot of effort to learn more English in the hope of attending interviews with the RM in the future. Do BTS have English songs? Most BTS songs have English titles, so it's useful for international fans who don't speak Korean. However, they do not have songs that are fully English speaking. Many of the songs are in Korean (or sometimes Japanese) with a few a word or phrase here and there. However, there is one song where you can hear them sing entirely in English. In October 2018, the group cooperated DJ Steve Aoki singlellä Waste It On Me. They delivered Aok a song for the song and all the lyrics were in English. While Waste It On Me is a great song about the pleasure of BTS fans, it's technically part of Steve Aok's discography, so it's not considered a BTS song. Why does BTS not add in English? BTS understands quite well that the lack of English songs can hamper their chances of getting a real number one wedding in America. Despite some foreign-language songs — such as Luis Fons's Despacito or even the previous K-pop phenomenon, Psyn Gangnam Style — sometimes become popular with mainstream audiences, most of american radio's hit singles are still in English. BTS's goal, however, was never to make itself an American boy band in order to gain more fame. RM once said: We don't want to change our identity or authenticity to get number one... If all of a sudden we speak in English and change all these other things, it's not BTS. We'll do everything, we'll try. But if we didn't get number one or number five, that's okay. And BTS is not alone. Most K-pop groups also don't speak in English, although K-pop has quickly grown into one of the world's most popular genres with loyal fan bases on every continent. Thus, BTS or other K-pop artists don't really have to sing in English because they already make a lot of money and have a fantastic career singing in their native language. In fact, it is more likely that the ears of listeners of American music will adapt to songs in Korean. Steve Aoki thinks so. He believes another K-pop song will soon get a high ranking on the American charts. I firmly believe in that, and I really firmly believe that BTS can be the group that can do it, he said. It paves the way for many other groups they've already done — and when that happens, we'll all celebrate. So, you've found a few songs or a great playlist on Spotify, but you want to listen to them offline. Fortunately, Spotify has a way to download your favorite songs so you can enjoy them whenever you want. Before you get carried away, you'll need a couple of things first: saving songs on your device, connecting to the Internet, and subscription to Spotify Premium. Prerequisites Spotify is a little picky about what it allows you to download on certain devices, so here's a quick summary: on the desktop, you can record liked songs and playlists for offline listening, but — unlike mobile — albums and playlists aren't in the equation. Desktop Downloading a liked song to desktop Downloading a list of whole liked songs to your computer couldn't be easier — just open spotify's Liked Songs section (using the Spotify app for MacOS or Windows) and swipe the download switch. That's all there is to it. Download playlists to desktop Step 1: When you view the curated playlist you want to download, click a heart-shaped icon located directly to the right of the Play button to save it to your library to make it easy to use. (If you don't, the download option remains hidden.) Step 2: Next, change the Download slider in the top right corner of any playlist. The playlist will start downloading, but remember that it may take some time depending on the size of the playlist and the speed of the Internet connection. Once saved, the playlist is available from the Playlists section to the left of the Spotify app for MacOS and Windows alongside all other playlists (even those that are not downloaded for offline listening). Mobile How to Download Liked Songs, Album or Playlist to Mobile Phone Whether you download a Liked Songs playlist, album or playlist, the procedure is the same across the board. Just download the collection you want to save and tap the download switch in the top right corner. The stripes will then begin to load. Note: You don't have to follow a playlist or album to download it to your mobile device. Upload a podcast to mobile step

1: When you view a podcast (such as Trends with Benefits), tap the three horizontal dots in the upper right corner – or the three vertical dots if you're using an Android device — to access the details panel. Step 2: Next, select Manage Downloads. Step 3: A download icon will appear next to each episode to help you choose which one you want to download. Note: You can also tap three horizontal dots to the right of individual cycles and select Download if you want a faster method. Troubleshooting Downloading additional songs is not available? It could be because you've hit such a frustrating 3,333-piece device-specific limit. If so, consider removing the playlist from the offline listening library. It frees up space for the songs you're trying to download. It is also worth bearing in mind that you can only download songs on three devices at a time. Try to add more and you'll be at an impasse. Reach this point, and your only option is to make a U-turn by turning off offline listening in another gadget. Supplier recommendations
